PAE consultation worksheet

Your questions, answers and next steps

Choose your priorities before the visit. Use the blank lines to record your clinician's answers. This planning tool does not determine candidacy or replace personal medical instructions.

01 What matters most to me?

Which daily problems and unanswered questions do I most want to discuss?

02 Diagnosis and choices

What needs to be confirmed? Which treatment options fit my situation and priorities?

03 Benefits, risks and results

What improvement is realistic for me? Which risks matter, and how will we assess results?

04 Records and costs

Which records are needed, and how can I send them securely? Who will confirm my exact plan's requirements, the proposed facility and the written estimate?

05 Locations and follow-up

Confirm each location separately; the consultation office and procedure facility may differ.

Consultation office: _____

Procedure facility, if planned: _____

Follow-up date, place and purpose: _____

06 My next step

What happens next, who will arrange it, and when? Which number should I use for questions?

Keep your completed notes private. Ask the care team for its approved secure record-transfer method.
